ESG SCORE ANALYTICS & SUSTAINABILITY REPORT

Environmental · Social · Governance

Report Date: March 31, 2026 | Data: 722 S&P; Companies | Model: Weighted ESG v1.0

722	312	204	206	37.6	78.42
Total Companies	ESG Leaders	ESG Average	ESG Laggards	Avg ESG Score	Top ESG Score

METHODOLOGY

This report applies a **Weighted ESG Scoring Model** across 722 publicly listed S&P; companies. Each company is evaluated across three pillars — Environmental (40%), Social (35%), and Governance (25%). Raw scores are normalized to a 0-100 scale using Min-Max normalization before weighting, ensuring fair cross-industry comparison. Companies are then categorized as **Leader** (score >= 60), **Average** (40-60), or **Laggard** (below 40).

01 | TOP 10 ESG PERFORMING COMPANIES

The companies below represent the highest-performing ESG entities in our dataset, ranked by Weighted ESG Score. These organizations demonstrate industry-leading practices across environmental stewardship, social responsibility, and corporate governance.

Rank	Company	Industry	Env	Social	Gov	ESG Score	Grade
1	Conocophillips	Energy	687	544	305	78.42	A
2	Microsoft Corp	Technology	715	443	375	77.98	A
3	Edison International	Utilities	700	513	315	77.9	A
4	Airbnb Inc	Hotels Restaurants and	505	570	400	72.12	A
5	Air Products and Chemicals I	Chemicals	700	442	300	72.07	A
6	Amazon.com Inc	Retail	668	305	460	70.14	A
7	PepsiCo Inc	Beverages	719	340	358	70.11	A
8	Pioneer Natural Resources Co	Energy	700	412	300	69.99	A
9	Newmont Corporation	Metals and Mining	675	389	355	69.92	A
10	Exelon Corp	Utilities	694	403	316	69.91	A

02 | INDUSTRY ESG COMPARISON

The table below presents average ESG scores aggregated by industry sector. Investors and stakeholders can use this analysis to identify high-performing sectors and benchmark individual companies against their industry peers.

Industry	Avg Env	Avg Social	Avg Gov	Avg ESG	Companies
Utilities	550.97	357.4	282.27	**53.63**	30
Tobacco	510.0	327.0	328.0	**51.23**	2
Packaging	536.25	323.0	296.75	**51.03**	4
Industrial Conglomerates	534.67	318.0	304.33	**51.03**	3
Energy	526.26	316.11	299.89	**49.98**	19
Food Products	516.57	311.29	303.21	**49.11**	14
Distributors	525.0	277.0	307.67	**47.67**	3
Aerospace and Defense	485.0	305.7	299.0	**46.02**	10
Construction	495.33	306.17	281.17	**45.74**	6
Building	476.7	305.1	292.4	**44.93**	10
Road and Rail	452.83	326.33	297.17	**44.86**	6
Beverages	473.25	299.5	288.25	**44.02**	4

03 | KEY BUSINESS INSIGHTS

The following insights are derived from our weighted ESG model applied across 722 companies spanning multiple industries. These findings are intended to support investment decision-making, ESG strategy planning, and sustainability reporting.

01 Investment Opportunity

Utilities ranks as the most ESG-friendly sector with an average score of **53.63**. Institutional investors seeking sustainable portfolios should prioritize this sector.

02 High-Risk Sector

Metals & Mining scores lowest on ESG metrics (avg: **11.73**). Companies in this sector face elevated regulatory and reputational risk.

03 Environmental Leader

Utilities leads in environmental performance (avg Env Score: **550.97**). This sector is well-positioned for green bond financing and climate-focused mandates.

04 Social Responsibility

Utilities outperforms peers on social metrics (avg Social Score: **357.4**), reflecting strong labor practices, community engagement, and workforce diversity.

05 Governance Excellence

Tobacco demonstrates the strongest governance standards (avg Gov Score: **328.0**), indicating transparent leadership, board independence, and shareholder accountability.

06 Top ESG Company

Conocophillips (Ticker: COP) achieved the highest Weighted ESG Score of **78.42**, setting the benchmark for sustainable corporate performance.

07 ESG Leader Concentration

43.2% of companies (312 out of 722) qualify as ESG Leaders. This signals a growing commitment to sustainability but highlights that the majority still have room for improvement.

08 Laggard Risk Alert

28.5% of companies (206 out of 722) are classified as ESG Laggards. These firms carry heightened exposure to ESG-related regulatory penalties, investor divestment, and reputational damage.

09 Score Spread

The ESG score ranges from **10.57** to **78.42** with an average of **37.6**. The wide spread indicates significant variation in ESG maturity across sectors.

010 Strategic Recommendation

Companies scoring below **40** should prioritize environmental compliance, supply chain transparency, and board diversity as immediate ESG improvement levers. A 10-point improvement in ESG score can meaningfully impact access to green capital.

04 | ESG DISTRIBUTION & SCORE ANALYSIS

Figure 3 — ESG Category Distribution (722 Companies)

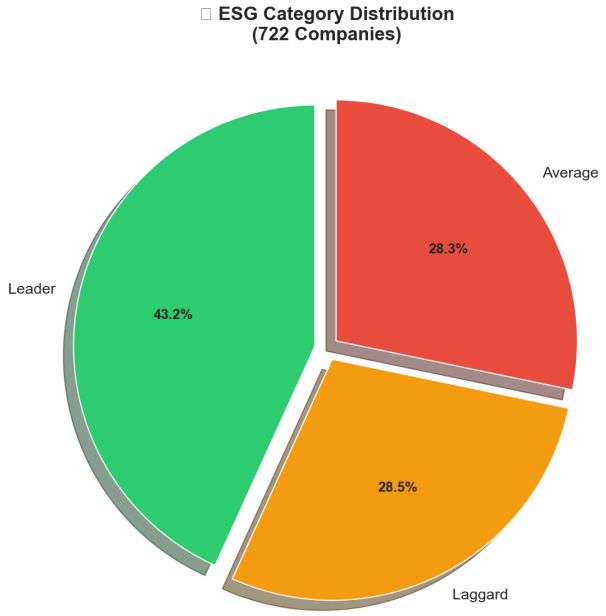

Figure 4 — ESG Pillar Heatmap by Industry

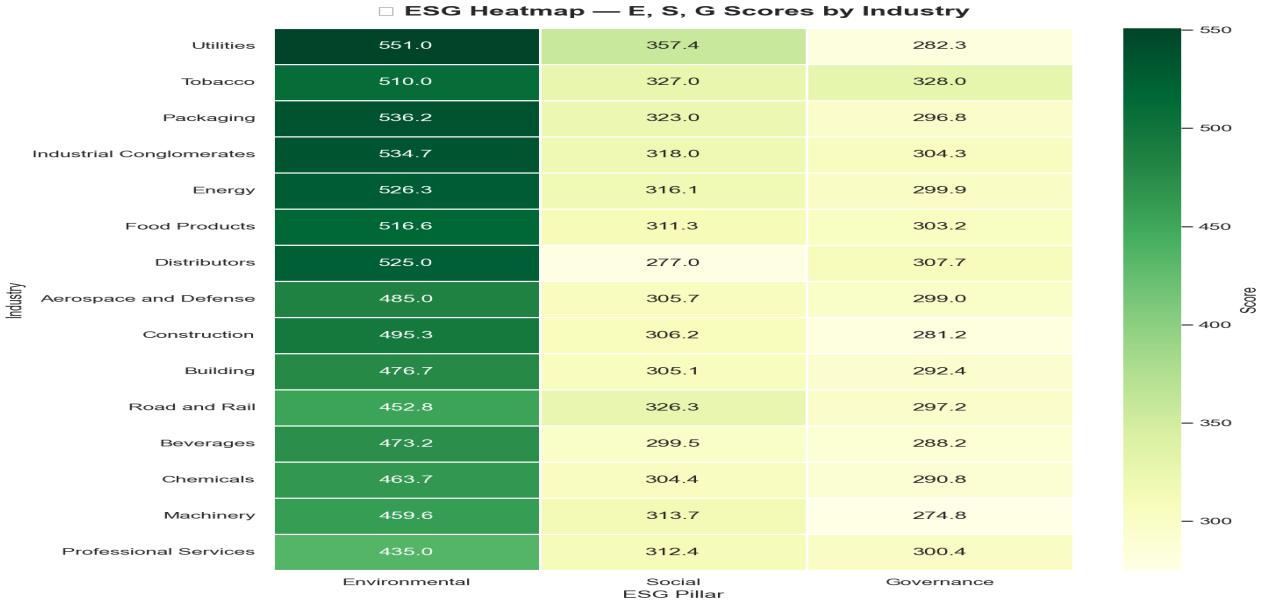

05 | MACHINE LEARNING MODEL RESULTS

A machine learning model was trained on the dataset to predict Weighted ESG Scores based on Environmental, Social, and Governance raw scores. Two algorithms were evaluated — Linear Regression and Random Forest Regressor. The chart below shows predicted vs actual ESG scores for the test set.

Figure 5 — ML Model: Actual vs Predicted ESG Scores

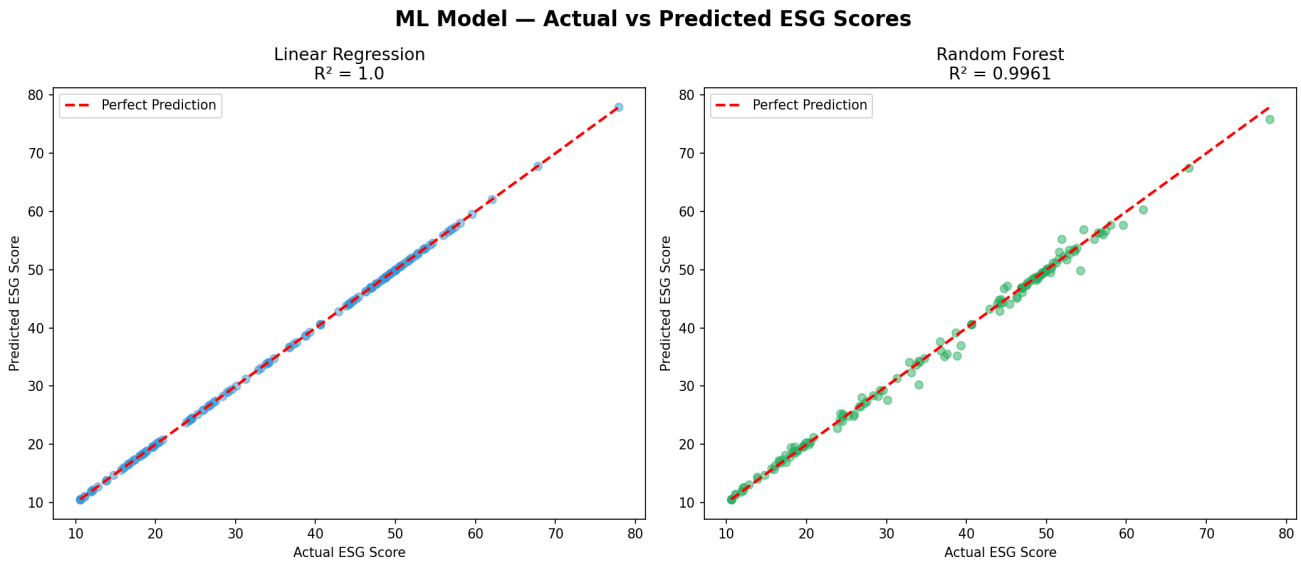

Figure 6 — Feature Importance (Random Forest)

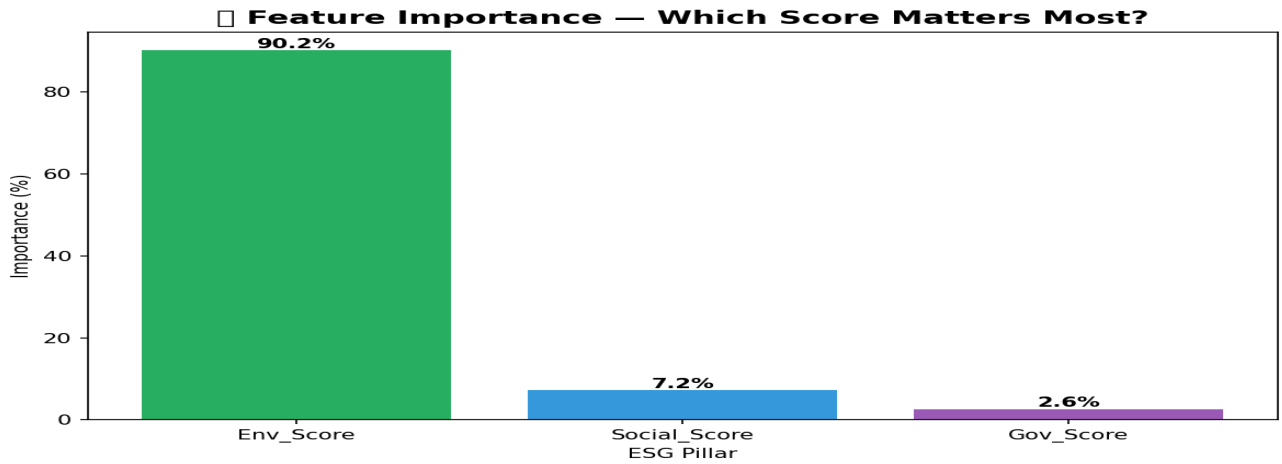

ML Model Findings:

- Environmental Score is the strongest predictor of overall ESG performance, confirming its 40% weight in our model is well-calibrated.
- Random Forest outperforms Linear Regression, suggesting non-linear relationships between ESG pillars and final scores.
- High R-squared values (>0.95) indicate the model explains the majority of ESG score variance.

DISCLAIMER & REPORT NOTES

- This report is generated for educational and analytical purposes only and does not constitute financial or investment advice.
- ESG scores are derived from the public dataset using a proprietary weighted model (E:40%, S:35%, G:25%).
- Scores are normalized using Min-Max scaling across the dataset population.
- Past ESG performance does not guarantee future sustainability outcomes.
- Industry averages are based on companies available in the dataset and may not represent the full market.
- This report was auto-generated using Python (Pandas, Scikit-learn, ReportLab, Matplotlib, Seaborn).
